

Workshop on Supply Chain Management – A Logistics Perspective

The 2-Days sessions aim to provide an intensive workshop that will fast track the mastery of Global Supply Chain Management with few practical ideas and tips to apply it to improve individual and organizations' performance. This program has also been designed carefully in consultation with a team of SCM for SCM Practitioners, Management and Supervisory personnel who aim to enhance their skills and knowledge by obtaining good understanding of International Supply Chain Management. Most importantly, key insights on how to apply them correctly in their respective organisation. The program will also cover the contemporary international supply chain management.

WORKSHOP OUTLINE

- Value Chain Management
- Globalization and its effects in SCM
- SCM Risk Management
- SCM Technologies /Internet of Things (IoT)
- Strategies to improve productivity and reduce SCLM Costs
- SCM Future Trends and Disruptive Technologies

WHO SHOULD ATTEND?

SCM Managers, Supervisors and Executives who are handling Logistics Management
